

Manufacturing Mission-Critical Printed Circuit Boards Since 1968!

For Immediate Release

Calumet Electronics to Debut TQM System at IPC Midwest Conference

CALUMET, MICHIGAN -- Calumet Electronics Corporation, a leading manufacturer of high performance printed circuit boards, will present its Mission-Critical Manufacturing™ methodology at the IPC APEX EXPO™ 2009, September 23-September 24 in Schaumburg, Illinois.

Mission-Critical is a total quality management approach to the production of highly reliable circuit boards and high performance relationships that delivers dock to stock reliability –

increasing the value of quality while reducing its cost. Choosing fewer, more capable PCB sources reduces process variability and increases lean manufacturing opportunities.

“We believe it is time to move beyond the rhetoric and take a look at the value proposition offer,” according to Stephen J. Marshall, National Sales Manager. “The market seems tired of the usual rant about quality and performance. After all, in today's marketplace those things are mandatory!” Calumet’s “old-school” approach to manufacturing produces proven results.

The IPC APEX EXPO is being held at the Renaissance Schaumburg Hotel and Convention Center in Schaumburg, Illinois. To learn about the Calumet value proposition, stop by Booth 400.

About Calumet:

Calumet Electronics is in its 41st year of manufacturing high-reliability printed circuit boards. Every board is proudly built in the security of its Calumet, Michigan, USA facility. The company is registered as a Small Business by the SBA and a certified HUBZone Enterprise. Financial strength is continually rated at 4A1 by D&B. Product realization is achieved within a quality system registered to ISO9001:2000 and certified by the Department of Defense to Military Performance Specifications for Printed Circuit Boards; MIL-PRF-31032 and MIL-PRF-55110. After four decades, the corporate focus remains constant: provide optimum value in every board and to every relationship!
